## Project Proposal

**Proposer:** Lupu, Emil (ecl1) - Academic

**Title:** Twitter for Traffic

**Offered to:**

**530** - Software Engineering Practice

**533** - Software Engineering - Methods (Specialism) - M.Sc in Computing (Software Engineering) - pcsse5

---

**Description:**

Group project to a) develop an android application that allows users to report vehicular traffic events and exchange them via twitter. b) to develop a pipeline to collect and analyse twitter traffic for reports about vehicular traffic made by others, extract relevant information from these tweets, and use this to predict localised traffic conditions.
